

Dear Netflix Hiring Team,

I'm a Data Engineer at Disney and am so excited to apply for the Analytics Engineer position at Netflix. Netflix's commitment to developing personalized user experiences particularly resonates with me. My time as a core member of Disney's Personalization and Experimentation team has thoroughly prepared me for this role.

Since receiving my undergraduate degree from Washington University in St. Louis in 2016, I have dedicated myself to building data tools focused on automation, interactivity, and above all else, data accuracy. For the last year and a half, I've harnessed my passion for tool building as a core member of Disney's Personalization and Experimentation team, the team which is responsible for the data pipeline that powers ESPN's recommendation engine. Almost all of the tools I've built in my current role have required a full-stack approach leveraging Python, JavaScript, and SQL. My experience has been highlighted by countless websites built with Svelte to deliver reporting metrics to executive management. I am a team player, always eager to learn new tools and I thrive in environments where I am given the chance to problem-solve independently.

I am excited about the challenging prospect of building customized analytics tools as an Analytics Engineer at Netflix. My time at Disney has demonstrated my competence in building advanced data tools to solve difficult business problems. I hope to discuss further how my experiences can be applied to Netflix's data objectives.

Thank you for taking the time to review my application. For more information, I can be reached by phone, (973) 747-5068, via LinkedIn (linkedin.com/in/charlieyaris), or by email (charlieyaris@gmail.com), and I invite you to view my website as well (cyaris.github.io). I look forward to further discussing this opportunity and hope to hear from you soon.

Sincerely,

Charlie Yaris
